Reno-ATM solution is the most effective and flexible cloud-ready ATM management platform available.

**Get ahead, and stay ahead,
with Reno-ATM!**

Renovite
Transforming payments

Facing Your Challenges

ATM operators are faced with growing complexities as a result of current ATM technologies failing to keep pace with the pressures of modern consumer demands. Typically these unaddressed needs include:

- “I need to get more life out of my existing investments”
- “I need to easily create new transactions myself”
- “I need vendors who are as flexible as I need to be in order to compete”
- “I need greater reuse of my digital banking investments”
- “I need the freedom to choose the right mix of hardware for my business”
- “I need greater automation in my bank branches”

- “My customers are demanding a richer, more personalized consumer experience”
- “I need deeper leverage of the global internet economy”
- “I need an effective transformation plan that is fast, safe and flexible”
- “I need to be master of my own destiny”
- “I need a trusted advisor who is driven by solutions that fit my specific objectives”
- “I need a delivery organization that can respond to market opportunities and threats in weeks not months”

Reno-ATM Satisfies All These Needs

Re-energize Your Investments

- Squeeze extra years of valuable service from aging devices by switching to the resource efficient Linux
- Augment your aging payments switch to facilitate rules-driven transaction workflow orchestration
- Deliver richer actionable intelligence to your operational management and maintenance teams.

Supercharge Your Possibilities

- Reno-ATM supports the latest Interoperability standards ensuring compatibility with third party products
- Establish new revenue opportunities through complimentary business partnerships
- Attract and retain new consumers through engaging and tailored services
- Optimize your branch services using advanced assisted self-service and extended opening hours

Achieve Faster, Safer Delivery Cycles

- Reno-ATM operates on a continuous integration model to accelerate the availability of new features
- Robust automated end-to-end testing catches even the smallest of ripples before they can become business problems
- Powerful workflow editing tools are easily mastered and facilitate rapid changes to system functionality

A Smooth, Low Risk Transformation

- Reno-ATM integrates easily into your existing infrastructure and is readily configured to accommodate established business processes
- Renovite’s expertise in transformational planning results in reduced risk and the optimal use of resources
- The migration of legacy ATMs can be tightly controlled to eliminate any business disruption

Why Choose Renovite?

You need a trusted partner who can take the environment you have and transform it into an ultra-modern services delivery platform. A platform that powers all your wonderful ideas – easily, quickly, and without disruption.

Renovite Does This

Renovite's core competency is the satisfaction of leading edge requirements through the deployment of advanced technology coupled with a client-focused, 21st Century delivery model.
